

ITS:Pay-As-You-Go Cash Acceptor for PaperCut MF

Introducing the ITS:Pay-As-You-Go Cash Acceptor for PaperCut MF

The ITS:Pay-As-You-Go (PAYG) Cash Acceptor is a high performance yet economical solution which facilitates payment of print and/or copy jobs. There is no requirement to purchase cards or have funds held in print and copy accounts. Users simply enter funds at the time of copying. When printing, the ITS:PAYG is connected to a PC which acts as a release station to send the job to the printer. Funds are then entered to pay for the job prior to release.

Designed to be easily installed, this self service device requires no staff intervention. The ITS:PAYG is available in both coin only and coin and note models and is the ideal solution for environments that support infrequent or transient users such as public libraries and internet cafes.

Benefits of the ITS:Pay-As-You-Go Cash Acceptor

FLEXIBLE The ITS:PAYG is the economical choice for self service payment for printing and/or copying in environments where staff are not always available to manually take payments. It has been designed to be simpler to install and operate compared with similar offerings.

ROBUST The sturdy housing of the ITS:PAYG offers a secure method for self payment in a one piece unit with no separate stand required.

ADAPTABLE The ITS:PAYG connects to your chosen device via the integrated serial port or copier port. Nothing else is required to take payment for copy jobs. For releasing print jobs a connected PC release station is required.

Technical Specifications

Operator Display
